

The mission of the Faculty of Pharmacy of Lincoln University College is to provide a high quality and efficient education so that they can meet the increasing competition in the field of pharmacy. Our Faculty of Pharmacy has been enthusiastically developing its programme. The research projects executed at the Faculty are concentrated on the design and manufacture of new synthetic and natural medications, innovative formulations, improving the methods of physical and chemical laboratory analysis used in the introduction of innovative medicinal products, toxicological analysis. Among the strengths of the Faculty are a comparatively young teaching and research staff comprising mostly of pharmacists, high quality of undergraduate and post-graduate education, effectiveness in ensuring research grants and a well-developed collaboration with the pharmaceutical industry.
